## Create Your Own Home Gallery

## Staircase Gallery

Follow the angle of your staircase. Align frame bottoms, tops and/or centers, and include frames of the same sizes and colors to create repetition. Use large focal frames and surround them with smaller frame sizes.

## Ledge Gallery

Cluster your frames on a ledge, using frames of different sizes and orientations. Overlap frames for more interest. Create a symmetrical display, using an odd number of frames, with a focal point in the center.

## Large Wall Gallery

Create a focal point by placing larger frames in the center, surrounded by smaller frames. Align the outer edges of frames.
